Professional Summary

Computer Science undergraduate with an interest in Python development, automation, and backend systems. Comfortable working with Python, SQL, databases, APIs, and structured problem-solving. Interested in building small software tools that simplify repetitive business processes and improve data handling. Currently developing practical experience with Flask, SQLite, REST APIs, JSON, Git, and AI-assisted development tools.

Education

Deogiri Institute of Engineering & Management Studies — **Chhatrapati Sambhaji Nagar**
B.tech Computer Science & Engineering : CGPA – 6.36 — Aug 2023 – Aug 2027

Dnyankunj Arts, Commerce & Science Junior College — **Chhatrapati Sambhaji Nagar**
PCMB : Percentage – 74.33% — Jan 2022 – Jan 2023

Varad Vidya Mandir & Rajhans Madhyamic Vidyalay — **Chhatrapati Sambhaji Nagar**
SSC Percentage – 91.80% — June 2020 – June 2021

Skills

Programming: Python, SQL, JavaScript, Java, HTML, CSS.
Backend & APIs: Flask, REST APIs, JSON, API Integration.
Database: SQLite, SQL, Relational Database Design.
Automation & Data: Python Automation, Data Processing, Report Generation, CSV/Excel Handling.
Tools: Git, GitHub, VS Code, Figma, Framer.
AI-Assisted Development: ChatGPT, Claude, GitHub Copilot, AI-assisted tools like Antigravity, Cursor, Codex, Claude Code.
Concepts: ERP Workflows, SDLC, Debugging, Software Testing, Problem Solving.
UI/UX Design: Wireframing, Prototyping, User Flows, Interaction Design, Design Systems, Component Libraries, Responsive Design.

Projects

1. Manufacturing ERP & Inventory Automation System

- Developed a Python-based ERP application for managing products, suppliers, purchases, inventory, production, and sales workflows. Designed a relational SQLite database and implemented CRUD operations for products, suppliers, stock, purchase orders, and sales transactions.
- Tech Stack**:** Python, SQLite, SQL, Pandas, Flask, CSV.

2. Employee Attendance & Leave Automation System

- Built a Python based application to manage employee records, daily attendance, leave request, and attendance history. Used SQLite and SQL to store employee and attendance data, with automated calculations for attendance percentage and leave balance.
- Tech Stack**:** Python, Flask, SQLite, SQL, HTML, CSS, JavaScript.

3. Purchase Order Management System

- Built a small web application for creating and tracking purchase orders, suppliers, products, quantities, and order status. Designed SQLite tables and SQL queries to maintain supplier, product, and purchase order records. Added automatic order totals, status tracking, search/filter options, and basic purchase reports to reduce manual record keeping.
- Tech Stack**:** Python, Flask, SQLite, SQL, HTML, CSS, JavaScript.

Certifications

- AI Tools Workshop(be10X)
- HTML, CSS & Javascript Certification(Unstop)
